Award Applicant Contact Information

Email Address _____

Project title - awards

Type of Award

Select the type of award you are applying for. Maximum duration of funding support is 3 years for doctoral awards and 2 years for postdoctoral awards.

- Doctoral (3 years)
- Postdoctoral (2 years)

Project Category

Please select the area of research that best aligns with your project proposal.

- Biomedical & Discovery Research
- Quality of Life & Care Research

Applicant Productivity

Please ensure your responses below correspond with the information provided in your Canadian Common CV (CCV).

Number

Awards (funding and recognition awards) _____

Engagement of People with Lived Experience

The Alzheimer Society of Canada strongly encourages the involvement of people with lived experience (people living with dementia and/or their caregivers) in research. Please explain how you plan to involve people with lived experience in your research, at what level (e.g., as collaborators, in design, as study participants, etc.), and the importance of this involvement to your project. If you do not plan to include people with lived experience in your research, please justify this decision and make clear why this is not feasible (100-300 words). Please visit the 'Pages' section of the ASRP Survey Monkey Apply platform to access an information sheet on the importance of engaging people with lived experience in research with a list of engagement examples.

 **ASRP/Fonds de recherche du Québec – Santé (FRQS) Award**

Candidates for FRQS funding opportunities must submit applications both to FRQS and to the ASRP. Research supported under this Program must be carried out at a university or allied institution within the province of Quebec. Postdoctoral Fellows who are seeking training not available in Quebec may conduct their research anywhere in Canada.

Yes

No

 Other agencies to which applications for support has been or will be made:

 **Financial Officer**

This is the individual, at your institution, who would administer award funds. If you are uncertain, consult your supervisor.

Category _____

Topic _____

Theme _____

 COVID-19

Please describe how your proposed project will account for present COVID-19 restrictions.

 Scientific Summary of Research Proposal

The objective(s), rationale, hypotheses, research plan and the significance of the study should be summarized here. The summary must include a clear explanation of the relevance of the proposed project to Alzheimer's disease and related dementias. Maximum: 500 words.

 Summary of Research and Career Goals

Response should include, but not be limited to: a) a summary of previous studies or activities that are relevant to the present proposal; b) a description of how this (or other) previous experience may have shaped current research interests; and, c) a statement of how an ASRP award could lead to a research career in Alzheimer's disease and other dementias. *For **Doctoral** Award applicants - please share your research question from your current PhD thesis, and explain how it relates to the proposed research question within this ASRP application.**For **Postdoctoral** Award applicants - please explain what additional experience you are hoping to acquire through your postdoctoral fellowship, and how is it aligned with the proposed research you are submitting within this ASRP application. Maximum: 750 words.

 1) Animal Research:

In the case of animal experimentation, lab procedures must conform to the Guiding Principles for Animal Experimentation as enunciated by the Canadian Council on Animal Care.

- Statement included
- Statement to be sent
- Not applicable

 2) Human Research:

In the case of human experimentation, the proposed research must be reviewed in a manner which conforms to the guidelines as outlined in the Tri-Council Policy Statement, "Ethical Conduct for Research Involving Humans". Projects that utilize discussions, sometimes audio or video-recorded, involving patients, care-givers, family members, and associated health professionals, may touch on issues that can be considered private or confidential. In these instances the applicant must provide a written assurance that agreement to obtain and use this information was given by the persons concerned.

- Statement included
- Statement to be sent
- Not applicable

 3) Biological and Chemical Hazards

Where biological and chemical hazards are involved in the proposed research, documentation must be provided demonstrating that the procedures meet the requirements as outlined in Health Canada's Laboratory Biosafety Guidelines.

- Statement included
- Statement to be sent
- Not applicable
